### TAX RATE CUT TWO MILLS

A busy regular session of the Blairmore town council was held on Monday night last. Present were His Worship Mayor Knight, all members of the council, E. D. Battrum (acting secretary), Mr. Larbalestier, two press representatives, several qualified municipal ratepayers and Charlie Shaw.

Minutes of special meeting held for the purpose of considering appointment of officials, and regular meeting of April the 3rd, were read and approved. From the minutes it was disclosed that Councilor Evan Morgan's motion that the new electrician's salary be \$100 was defeated by an amendment that no change in salary be permitted. Also contained in minutes passed was decision of the council to increase the educational poll tax, or minimum tax, from \$4.00 to \$5.00.

Reply to letter from the council re relief wage rates was received from Mr. A. C. McKenzie, superintendent of charity and relief, Edmonton.

Considerable discussion took place over the matter of cribbing along Lyon Creek. It was claimed that work done so far has no effect but to protect C.P.R. property, and that attention should be paid to more dangerous places further up the creek bed. Council agreed that something should be done to protect property of ratepayers further to the south.

A by-law to regulate installation of electric wiring and repairs received three readings and was finally passed. In justice to citizens in general, the report of such by-law should be published by the town.

Matter of collecting tax arrears was turned over to the public works committee for consideration and action.

Brassio Pagnucco advised the council that he had paid for certain property purchased from the town on August the 7th, 1929, and as yet had not received title. Council decided to grant the necessary title to Mr. Pagnucco.

It was decided to charge a fee of 50c per month to any family receiving water supply from a standpipe.

Application of the Bellevue Tennis Club for permission to take several loads of brick shale from near the site of the old brick yard was granted.

John Sprin, Peter McEwen and James Lloyd made application for relief. These were handed over to the relief committee for consideration.

Communication was received from the Lethbridge Laundry Co. objecting to a fee of \$5.00 per day understood as chargeable against them in the event of their not taking out an annual license to operate in Blairmore. They stated that they were paying \$10 for a yearly license at Pincher Creek and a similar amount at Coleman. Councillor Peressini moved that annual license fee for Lethbridge and Fernie laundries of dry cleaning plants be placed at \$25.00, which motion was lost, and motion by Councillor Morgan that fee be \$15.00 was carried. Councillor Morgan felt that excellent service could be expected from local Chinese laundries, and that they should be protected.

An assessment notice was received from the Workmen's Compensation Board, placing rate of assessment for the town at \$75.00. Secretary was instructed to notify board that the town did not anticipate spending more than \$3,000 in relief and repair labor, this year, as compared with an estimate of \$10,000 last year, and asked for a revision of rate.

Accounts included one from firemen for fees for three times turning out for fire drill. The bill amounted to \$29.50, representing practically one dollar a day for the month. Objection was raised to the enormity of such expense, and the fire chief was asked to permit no more drills this

### NEW SECRETARY-TREASURER TOWN OF BLAIRMORE

At the regular meeting of the town council of the Town of Blairmore on Monday night, Mr. C. M. Larbalestier was by-law installed as secretary-treasurer, succeeding Mr. A. J. Kelly, re-elected.

Mr. Larbalestier has had considerable experience in municipal work, and is well recommended.

### ANOTHER WORD FROM THE KNOW-ALL

Addressing a meeting at Drumheller recently, John Sokoluk, credited as being president of the Mine Workers' Union of Canada, stated that the "threatened slowdown at Fernie was merely an attempt to bring down wages throughout the Crow's Nest Pass." And, of course, a lot of bores listened to him and believed him.

### REALISTIC PRISON SCENES IN "I AM A FUGITIVE"

The prison sets shown in "I Am a Fugitive from a Chain Gang," a Warner Bros. picture now playing at the Orpheum theatre, are said to be the most startlingly realistic of any thing seen on the screen recently. There include a whipping post where men are flogged for the slightest violations, an areal with guns for guards, kennels for bloodhounds to chase escaped convicts, the great mess hall where prisoners eat in chains, the bunk house where prisoners are locked to posts while they sleep, the great rock piles where they break stone from morning to night. These form the background of a thrilling spectacular story based on the novel of Robert E. Burns, now a fugitive from a prison camp. Paul Muni takes the stellar role, with a noted supporting cast including Glenda Farrell, Helen Vinson, Prestos Foster, Edward J. McNamara and Sheila Terry. Myron LeRoy direct ed.

A special feature for Friday night will be a 20-minute vaudeville act by Billie Burton Cook, trans-Canada hiker and hobo black-face comedian. This act will take place after news reel and comedy and before feature.

Account of \$34.50 for repair work was also received from J. Packer. Council was advised that of certain equipment installed in firemen's quarters in 1926, only four chairs and two tables remained.

Upon motion, the town's order for 500 caragana bushes was cancelled. The provincial department of relief notified the council that they could not tolerate such items as medicines, jams, olive oil, etc., as necessary relief items, and erased same from accounts received from the town. Upon motion, council assumed responsibility for such items already served, and instructed the secretary to notify local stores to the effect that the town will not be responsible for such goods supplied in future on scrip orders, and that doctors' prescriptions are not to be filled until sanctioned by the town's relief committee or the secretary.

Blue prints of proposed tourist camp for east Blairmore were submitted and approved. The applicant proposes erecting six or eight cabins, as well as installing several gas tanks. Later they purpose equipping one or two cabins with shower baths.

The old Holloway property, at the corner of Eighth Avenue and Stuart Street, was sold to F. Demoustier for \$225, and two lots on State Street, between Ninth and Tenth Avenues, were purchased by A. E. Ferguson for \$40 each.

Upon motion, Tuesday, May the 2nd, was set as the date upon which the council will sit as a court of appeal at 2 p.m., to consider appeal against assessments.

The business tax by-law received

## COLE'S - THE MODERN THEATRE - BELLEVUE

Bill there, but he probably couldn't get away from duty to wait for us. Our supplies are cached in that red-willow thicket, back next to the wood. We'll go ashore and get them."

Buzzard cut off the ignition. The engine roar stopped. As the plane glided down at a mile-long tangent and swept over Goose Point, Alan leaped out into the slip-stream and looked under keel, searching the flag-and-white headland for a possible sight of Bill Hardcock.

"Hardly expecting to meet Bill, he was not surprised when his old partner failed to show up. But as the machine glided silently over the point, his eyes were caught by an object there on the muddy landwash. At a second glance he saw it was a large gasoline drum lying in full view at the very tip of the headland.

The sight of the drum started him. He queried silently: "Why the devil did Bill put that thing out there so glaring? He didn't need to draw my attention; we arranged about the cache."

Beyond the point the plane touched the surface, plowed on through a shower of spray and came to a stop three hundred yards off the landwash.

In the scarlet-and-gold police livery, hidden behind a low-sweeping balm at water edge, Inspector Haskell and Corporal Whipple watched the machine whirr low over the point. As it came down and down, Haskell clutched his rifle a little tighter and watched intently.

His heart leaped as the machine touched the wavelets skimming on a little distance, and came to a stop. "They're going ashore," he breathed excitedly to Whipple, as though unable to believe his incredible luck. "We'll skim out and ram the plane. Get ready!"

Useless, Alan stood up in the cockpit and searched the headland with his glasses. Over and over he kept telling himself that it wasn't like Bill's cautious old patrol pattern, to roll that drum of gas out there.

While he was searching the point, he felt Buzzard excitedly grasp his arm.

"Alan! Look! . . . Lord's sake!—look over there!"

Alan whirled and looked where he pointed, at the southern shore of the lake eight miles away.

On a lush timbered headland there a sudden sheet of flame had leaped up nearly fifty feet into the air and stood out above the tree tops, with a fiery puff and cloudlet of smoke visible for miles and miles across the open water. A few seconds later the flame died down a little, as though it had been of explosive origin, but a clump of paper birches up which the flame had raced still continued to burn like a gigantic torch.

Focusing on the distant headland, Alan saw nothing except the fire-wrapped birches. As his brought the glasses down, mystified, frowning, his uneasiness swept through him again, sharp and insistent. That suspicious drum of gasoline—Bill surely wouldn't have rolled it out there. That huge burst of fire across the lake—it had some meaning.

"Buzzard, something's wrong here! All wrong! I don't like the idea of going ashore here. If something's wrong, you don't know what we might be walking into."

"Well, what're you going to do? We've got seven gallons of gas in the wing tank and five in the emergency, and we can't get far on that!"

"Maybe so, but I'm not walking into any trap. Somebody's over there where we saw that big gob of fire. I'm suggesting we get into the air again and hop across and have a look-see. That's our best bet. This layout here is all off-color and I know it!"

"All right. We'll hop across. But a couple more hops around over this landscape, and we'll be rocking on the wavelets."

From the height of a hundred feet Alan looked ahead through his glasses, scrutinizing that timbered point where the birches were still ablaze.

He started as the glasses picked up tiny man-figure far away on that headland. Watching he saw it rush out upon the extreme rock tip. With the plane whirling nearer, he caught the figure in sharper focus—and recognized Bill Hardcock!

Waving his arms, hand and part of a pine tree, Bill was frantically trying to draw their attention.

Alan, leaned forward, cupped his hands and shouted to Buzzard:

"That's Bill! There on the headland. Light and taxi in. He's waving us down, so we must be safe. We'll soon see what the trouble is."

They angled down on the water and skimmed close in ashore. In a canoe Bill came paddling out to meet them.

"I knowed you'd make it, Alan!" he panted, looking with marvelling eyes at Buzzard and the plane. "I knowed you'd show up sometime. The

gas and oil—that is, most of it—it's right ashore here, ready for you. There's more cached up the Alooska, too. I was scared. . . . When you it down over there. . . . Lord! I was afraid you were a gonner!"

Hastily introducing a new partner to an old one, Alan demanded: "What d'you mean, Bill? What under heaven are you doing over here? What happened? Man, you're all shot!"

"I 'Am half-dead," Bill admitted. His voice was thick, he could hardly stand up. With the long strain over, a fearful reaction had set in. He looked ready to fall down dead asleep.

"But what happened?" Alan repeated.

"Alan, that Johnny Jump-up caught onto our trick. He was out to bag this air machine, and nail you two. And he came skittish close to doing it. Lemme tell it:

"I had those drums cached over there on Goose Point like we arranged, and I was waiting there, never suspecting a thing. One evening—Must've been four or five days ago—I've'd an near lost track of time. . . . Anyway, I was sitting there in the willows slapping mosquitoes and listening to a couple whisky-jacks racket with something back at the timber edge."

"I hadn't nothing much to do, so I sort of moseyed back that way to see what all the fuss was about. When I got up pretty close I all at once smelled tobacco smoke, cigarette smoke. Just a faint whiff, but no mistake about it."

"What the h—!?" says I. "Who's smoking Turkey tobacco around here? It made me leery right away. I followed my nose up-wind and smuck up real careful. There in the fog of haze was a Smokey, that Opt-Tomax, sitting against a tree, lighting one cigarette on the butt of the last. They were that kind of cigarette that Haskell gets clear from Paris, Alan."

"When he finally got wise to somebody being near, he grabbed for his rifle. But I jumped for him too quick and hit a couple times, and while he was coming out of it I loped that gun of his around a tree. Then I collared him and asked him what the condemnation his intentions might be. At first he closed up like an oyster and wouldn't do nothing but grunt and look sour. I was suspicious of him laying low there watching me, so I up and lamed him—laid out him then and there."

"Haskell had hired him to shadow me and spy out what I was doing. He must have got hep somehow to me taking that gas. And he and that fishworm Whipple were coming there to Goose Point in the launch to get me, gas oil, then lay low and nail you two when you lit over there. Two bits to a shirt button they're over there right now!"

As he thought how close he and Buzzard had come to going ashore and being captured, Alan shuddered. Bill went on: "When the Smokey told me that. . . . Say, did I make some tall tracks? I never got such a wiggle on in my life. With the Smokey helping, I made two trips across the lake and snaked the drums all away—all except one drum when I heard the launch coming and didn't have time to take—"

"It's still over there," Alan interrupted. "They rolled it out in plain sight like a decoy, but instead of that it made me suspicious. They overplayed. But what got you all set this way, Bill?"

(To Be Continued.)

Would Use Wheat

Urges Use Of Surplus Grain For Making Industrial Fuel

Action by the Department of Agriculture with a view to the use of surplus grain, principally wheat, for the manufacture of industrial alcohol was urged in the House of Commons.

The department, said G. G. Coote, (U.F.A. Macleod), when pressing the matter should make a careful enquiry into the feasibility of early action in this direction.

With a mixture of 15 to 20 per cent industrial alcohol and the balance composed of gasoline, a motor spirit fuel could be produced.

A bill along these lines was being introduced at Washington, asserted Mr. Coote. The U.F.A. member read an editorial estimating the use of surplus wheat for manufacturing industrial alcohol would raise the price of wheat about 10 cents per bushel. Refuse from the grain used for manufacturing industrial alcohol could be used for feeding purposes for cattle, Mr. Coote said.

Proposal was made during consideration of estimates of the department of agriculture.

A full dentist's kit contains 6,000 different instruments.

## WOMAN LOSES 28 lbs.

## Trips Upstairs Like a 2-Year-Old

A woman writes:—"Three months ago, after much argument, I was persuaded against my will to try Kruschen Salts to reduce my weight, which was 222 lbs. I had tried other things, but all to no avail. After three weeks of Kruschen I had lost 2 lbs. 4 ozs., and I felt five years younger. I really must say I feel a different woman. My age is 37 years. I have now lost 28 lbs. to date and while before, to go upstairs was a great effort, now, as my husband says, I trip up like a two-year-old." (Mrs.) S.G.B.

Kruschen Salts keep the system free from encumbering waste matter. Unless this waste is regularly expelled it will give rise to rheumatic and other body poisons. And Nature is loath to take the defensive measure of storing this poison-breeding material out of the way in the form of fatty tissue. Unlike most salts, Kruschen is not merely a laxative. It is a combination of six salts which have a tonic influence upon every organ, gland, nerve and every organ of the body.

## An Unenviable Record

## United States Has Highest Murder Rate in World

The United States still leads the civilized world in the number of murders per year, according to Dr. Frederick Hoffman, statistician, whose survey based on homicide records from 180 cities, is published in the Spectator, an insurance periodical. The rate for the United States in 1932 was 10.8 homicides per 100,000 of population.

"Human life was never so cheap and insecure in the United States as it is at the present time," writes Dr. Hoffman, "and murder is decidedly more common in the country than in any other country of the world which makes a claim of being a civilized one. It is also the lamentable truth that crime and punishment in this country often lie far apart."

He noted that the rate for England and Wales in 1931 was 0.5 per 100,000 of population. He pointed out that in the United States, where homicide is the leading cause of death from 180 cities, as compared with 66 per cent in the United States.

Dr. Hoffman said the shooting of Mayor Cermak of Chicago and the murder of President Roosevelt are instances of the case with which the means of murder can be acquired.

"Murder more than ever," he wrote, "is becoming an ingenious art. If not a trade, in this country and the number of murders at large must be quite considerable."

## A Bad Custom

## Getting By Without Paying Is Not To Be Commended

A Western Ontario paper defends young men who stole a ride on a train to see a hockey match in Toronto. It recalls that in the past nothing much was said when lads helped themselves to somebody's packing cases to start a fire with, or took apples from an orchard, or sneaked into the Caledonian games without paying anything at the gate. But one bad custom does not excuse another worse one. There are people who think it is clever to slip by the street car conductor without putting a ticket in the box, but they probably would not like to be caught doing it.

## Record Still Stands

The world's record for longest non-stop run in the history of railway operation, made in 1925 between Montreal and Vancouver, a distance of 2,937 miles, still stands. It was made by an electric car evolved by Canadian National Railways motive power engineers. The journey was completed in 67 hours and the Rocky Mountains were crossed at a speed of 40 miles an hour.

## A Lucky Occupation

Babe Ruth has signed a contract to play with the New York Yankees for \$25,000 a year. He has been with the same team 14 years and has been paid over \$800,000. He is 39 years old and can retire at any time with an assured income of \$10,000 per year. Baseball has been good to him.

Some of the stunted trees in the "Barren Lands" of Canada are fully 200 years old.

Silk yarn exported from America by Argentina last year weighed 84,514 pounds.

## The Building Industry

## Timing Of Public Construction Projects For Depression Periods

Timing of public construction projects for depression periods to help stabilize the construction industry is urged upon the federal government by the council of the Saskatchewan Association of Architects.

The council met at Regina recently to back up the decisions of a meeting of representatives of the construction industry held in Toronto in February.

Committees were appointed for Regina, Moose Jaw and Saskatoon whose duty it will be to discover what building could be undertaken by corporations which do not have to depend upon loans to finance construction.

## Guard Your Child Against Diphtheria

## Toxoid Treatment Is Simple and Harmless

Diphtheria is a serious disease of the nose and throat caused by germs. It selects young children as its victims. Many children who have had diphtheria are left with some weakness, serious heart trouble, or even paralysis.

Protect your child against this foe of happy childhood.

Toxoid treatment will protect your child.

This treatment is given in 3 visits, and is simple, harmless, and lasting.

Your family doctor can give your child this protection.

If you have no family doctor, ask your health officer to advise you.

## THE RHYMING OPTIMIST

By Allan Macdonald

## OASIS

As trees are in the desert, As islands in the sea, Or the first star at twilight hours, So are you, my love, to me!

The traveller on Sahara Where all is burning, bare, Who finds a group of waving palms Has gained an Eden there.

The captain of a vessel Long tossed by wave and wind, Who sights at last a little isle, Leaves fear and care behind.

To you, my cool oasis, My fruitful isle of rest, I turn always with rapturous torch Abaze within my breast.

The drink within the desert, The little isle at sea, These things, and more, are you, my love, Through all of life to me!

## Worst Yet To Come

Seismologist Says Californians May Expect More Severe Earthquake

Folk who live in the zone of California recently shaken by earthquake are certain they passed through a period of major tribulation. We agree they did. People who were in houses and buildings of larger size say they shook like jelly even if they did not totter and fall.

Into the picture strolls Dr. H. O. Wood, California Institute of Technology and Carnegie Institute seismologist, and calmly announces that although there have been such disturbances covering a period 20 years the worst quake is yet to come.

## Famous Monument Damaged

Pilgrim Fathers Monument In Massachusetts Hit By Lightning

The national monument to the Pilgrim Forefathers, of Plymouth, Mass., reputedly the largest granite monument in the world, was struck and damaged by lightning during an electrical storm recently.

The figure representing law, near the base of the monument was badly damaged and the pedestal mowed a foot. Damage was estimated at between \$2,000 and \$3,000.

## Movie Life Story Of Prince

## A movie life story of the Prince of Wales is soon to be released for general showing. It will include pictures taken of his early life, among them his proclamation as Prince of Wales at Carnarvon, and will carry on through 1932. The film has been seen by the Prince, who passed on the scenes shown.

Although Lithuania produces no silver, its coins in the metal have a face value of \$1,240,000.

London's new municipal golf links will have a 150-year-old mansion as a clubhouse.

## It's SAFE!

Everyone accepts the fact that Aspirin is the swiftest form of relief for headaches, neuritis, arthritis, periodic pain, and other suffering. If you've tried it, you know. But no one needs hesitate to take these tablets because of their speed. They are perfectly safe. They do not depress the heart. They have no ill effect of any kind. The rapid relief they bring is due to the rapidity with which they dissolve.

So, keep these tablets handy, and keep your engagements—free from pain or discomfort. Carry the pocket tin for emergencies; buy the bottle of 100 for economy. The new reduced price has removed the last reason for trying any substitute for Aspirin.

So, keep these tablets handy, and keep your engagements—free from pain or discomfort. Carry the pocket tin for emergencies; buy the bottle of 100 for economy. The new reduced price has removed the last reason for trying any substitute for Aspirin.

## DID YOU EVER STOP TO THINK

The Editor of the Grande Prairie, Alberta, Herald, a newspaper that serves the great Peace River country so well, in commenting on a small advertisement run in the Herald recently, said:

We have often heard of psychology in advertising, but it was not until last week that we had an opportunity of trying it out. The results were most gratifying. It all had to do with an advertisement inserted in the Herald's Swap-Barter column. The advertisement as handed in read as follows: Will trade 5 tube battery radio receiving set, complete with tubes and loudspeaker for good milk cow.

Just as the copy was about to go out to the linotype operator to be put in type, along came a member of the town's clergy. He spotted the copy and the humorous side of his make up could not be controlled. He suggested that the phrasing of the advertisement be slightly changed. We agreed, and as a result the copy appeared in print as follows: Will trade 5 tube battery radio receiving set for a good milk cow, complete with tubes and loudspeaker.

The results were almost spontaneous. The Herald had been in the mails but a few hours when the phone began to buzz with enquiries about the cow with tubes and loudspeaker. Passersby tapped on the office window and laughingly asked us if we still had the cow. Saturday morning's mail from the west had its quota of comments.

Most interesting of all, however, was the fact that a farmer in the Huallien district wrote in to say that he wanted the radio and had a cow to offer in trade. The applicant did not state whether or not the cow came up to the specifications as set forth in advertisement. At any rate we handed the reply to the advertiser and it is hoped that both parties are now satisfied.

During a recent visit of Lord and Lady Baden-Powell to Rome, when they were received at the Vatican, His Holiness the Pope once again expressed his approval of Scouting and its disregard of class ties and race. He recalled his pleasure at the visit to Rome four years ago of a pilgrimage of 10,000 Catholic Boy Scouts of many countries.

Speaking of the miners of the Red Deer Valley and the operators coming to a satisfactory two-year agreement, the Drumheller Review states in part: "The mines working under the United Mine Workers of America agreements have always paid their men, and this cannot be said of a certain two or three mines in the valley. There is a vast difference between taking a reduction in wages and getting one's pay cheque, than maintaining that no reduction will be taken, and at the same time getting no pay cheque at all, or just an occasional sub."

The following story will interest the older generation of Tories and Grits. It is termed a "John A. Story." In the 1891 election, Sir John A. MacDonald was addressing a public meeting in Hamilton. One of the audience got nettled at one of his arguments and gave voice to his objections by yelling at the speaker, "Oh, go to hell." Sir John's comeback was this: "Well," he said, "during my long public career I have been invited to a great many places to address the people, but I must say this is the first invitation I have to Grit headquarters."—Wiarston Echo.

## ADDS MINERAGRAPHIC LABORATORY TO ORE DRESSING FACILITIES

Canada's mineral industry has at its service perhaps the most modernly equipped ore dressing and metallurgical laboratories on the continent, and facilities offered therein by the Department of Mines, at Ottawa, have recently been augmented by the addition of a mineragraphic laboratory.

Microscopic examination and spectrographic analysis have been found to be of the greatest value as a guide and an aid in investigating methods for the treatment of ores. The examination of typical samples of ore under the microscope before concentration or other treatment, experimental tests are undertaken, gives the investigator information in advance regarding the mineral constituents, their relationships and grain size. With the results of the microscopic examination and the chemical analysis before him, he is enabled to conduct the examination with a minimum number of experimental tests.

The examination of ores and mill products, both microscopically and spectrographically, not only serves to reduce the number of experimental tests to be made in the ore dressing laboratory, but provides a valuable qualitative guide to quantitative chemical analysis.

In carrying out microscopic and spectrographic studies in the mineragraphic laboratory, the sample is first mounted in bakelite and polished. The polished section is then examined under the reflecting microscope, and optical, etching, microchemical, spectrographic and quantitative microscopic methods are combined in determining the characteristics. Photomicrographs are taken to illustrate the significant features of both the ore and mill products and polished sections, representing the typical samples are filed for future reference. A report is rendered for each ore studied. This report, though primarily for the use of the investigator, is also available to those interested.

The mineragraphic laboratory, its purpose and equipment are described by W. B. Timm, chief of the ore dressing and metallurgical division, and M. H. Haycock, Mineragrapher, in a memorandum (Series No. 58) just issued by the Department of Mines. Copies may be obtained from the Director, Mines Branch, Department of Mines, Ottawa.

## INCREASED MINERAL OUTPUT

Winnipeg, Man., April 15.—Increase in the value of Manitoba's gold, silver and zinc output in 1932 are features of the preliminary report of the mines branch of the provincial department of Mines and Natural Resources.

The province produced last year a total of 122,790 fine ounces of gold, valued at \$2,538,294, as compared with 122,128,558. The zinc and silver produced in 1932 are valued at \$1,004,016 and \$328,283 respectively, as compared with \$898,335 and \$249,877 in 1931. Copper output increased from 45,821,432 pounds to 52,706,861 pounds, but the total value declined from \$3,835,254 in 1931 to \$3,362,803 last year.

## NO SLEEP AT THIS SWITCH

Falling asleep at the wheel is an experience far from rare, but slumber under such circumstances has a tendency to be permanent, and few people permit themselves the indulgence, if they can avoid it. To be absolutely safe, a British motorist, who makes frequent long drives—woman, at that—has equipped her car with an anti-sleep alarm. It consists of a special switch on the steering wheel, which sets off a loud buzzer if hand pressure is relaxed.

Harley Ugham: "If you had five dollars in your pocket, Val, what would you do?"

Val: "I'd wonder where pants I had on."

BLAIRMORE UNITED CHURCH  
Rev. Albert E. Larke, Minister

"Serve the Church that the Church May Serve You."

Services Sunday, April 23rd, minister in charge:

11 a.m.—SENIOR SCHOOL  
2 p.m.—JUNIOR SCHOOL  
7:30 p.m.—PUBLIC WORSHIP.

## ST. LUKE'S CHURCH NOTES

Rev. A. S. Partington, B.A., Rector

Services Sunday, April 23rd, as follows:

Sunday School in the hall at 10 a.m.  
Evening Service in the church at 7:30 o'clock.

## BLAIRMORE PUBLIC LIBRARY

Books being placed on the shelves this week are:

"The Sword Hand of Napoleon," Cyrus Townsend Brady; "Conrad," K. S. Prichard; "Conrad to a Friend," Richard Curle; "The Street of the Island," Stark Young; "Paying Guests," E. F. Benson; "The Sentimentalists," Dale Collins.

The library hours are Tuesdays and Thursdays from 7 to 9 p.m., and Saturdays from 7 to 10 p.m. The fees are \$1.00 per year for residents and \$2.00 per year for non-residents.

## COLEMAN CLMRO.

## DORIAN SOCIETY

The Coleman Cymrodorion Society held their monthly meeting in the Knights of Pythias hall at Coleman on Friday last. A large number of members were present. The business session was followed by a programme arranged by the entertainment committee. The programme was as follows:

Chairman—J. T. Griffiths.  
Vocal solo, "Land of my fathers," Miss Annie Griffiths.  
Euphonium solo—Mr. A. Morris, Blairmore.

Song—Mr. Edgar Thomas.  
Vocal solo—Doris Griffiths.  
Tap dance—Mr. Harry Harris.  
Recitation—Milley Griffiths.  
Violin solo—Miss Elizabeth Moore.  
Vocal solo—Miss Alberta Phillips.  
Duet—Blodwyn and Billy Lewis.  
Pianoforte solo—Mrs. W. G. Hopkins.

Community songs were sung between various items on the programme. A supper and dance followed.

Official announcement has been made that Jasper Park Lodge, the well-known summer resort in the heart of the Canadian Rockies, will be opened this year on June 15th. One of the features of the early reservations already made is the number of inquiries regarding speckled trout fishing in Maligne Lake, which was opened to the public for the first time last summer. The stocking of the glacier-fed lake with speckled trout fingerlings has proven one of the most outstanding efforts in the history of fish culture.

It is rumored that 35 men from Alberta came in yesterday to prospect in the Cranbrook district. It is said these men were gratified by the Alberta government. While Dame Runcie is generally a feckle miss, yet the persistency of the report and the fact that several of the men have been questioned, seems to lend credence to the rumor. If this is true, it implies a foresight on the part of the Alberta premier far in advance of anything of the kind in British Columbia politics. Our government and our mining ministers and engineers hold such optimistic opinion of the mineral wealth of our district, he it said, their everlasting discredit.—Cranbrook Tribune.

Alas, Cameron has left Coleman to spend a while on his fruit ranch near Wyndel, B.C.

Mr. and Mrs. O. O. Davis have left Calgary to take up permanent residence in Edmonton.

It is calculated that about ten per cent of all federal, state and local taxes collected in 1931 were paid by automobile owners.

The remains of Dr. R. C. S. Paley, who met death in a ski climb near Lake Louise, were laid to rest at Banff on April the 17th.

Alexander McLean has left Blairmore, Cape Breton, hoping to make the hike to Vancouver in one hundred days—about thirty miles a day.

Mr. Buck, of Calgary, has purchased the Auditorium hotel at Nanton. Mr. Buck was formerly connected with the Calgary daily papers.

The many friends of Mr. J. A. Smith, high schools inspector, will regret to learn that he is seriously ill at his home in Edmonton.

Cabin number one, with sitting-down-place number one, are just about completed in east Blairmore. The cranks have not yet been installed.

The twenty-five-cent liquor permit fee became effective in British Columbia on Tuesday. You can now take beer from a beer parlor and go outside to quench the fire.

The Bellevue baseball club will hold their annual dance in the Oddfellows' hall at Bellevue on the night of Friday, May 5th, with Bateman's Lethbridge orchestra in attendance.

The death of Mrs. Beatie Jean Cameron, wife of Angus A. MacAuley, occurred at Quincy, Massachusetts, on March the 30th. Mrs. Allan Hamilton, Alberta, is a sister.

The Stratford Beacon-Herald remarks: "Figs—or rather the price of them—have at last reached the five-dollar mark. As the hockey announcer would say: 'they are now at the blue line.'"

The Associated Breweries of Canada will operate a plant in Spokane. The Associated Breweries of Canada, Limited, a five-million dollar corporation, operates breweries at Lethbridge, Edmonton, Regina and Calgary.

Charged with espionage and sabotage, McDonald and Thornton, two British engineers, were sentenced by a Moscow court to two years and three months, respectively, in jail. Russian accomplices received sentences ranging from one and a half to ten years.

C. F. Hayes, editor of the Creston Review, is mentioned as a likely Liberal candidate for the Creston-Nelson constituency in the forthcoming election. Mr. Hayes, before moving to Creston, was employed with the Edmonton Journal under the late Editor Jennings.

Fifty-one Alberta families trekked from cities to the land last fall in the provincial-federal back-to-lard movement, according to officials of the agricultural department. Another 100 families are expected to go out this spring. Alberta officials say that in this province the 51 families totalled approximately 300 individuals.

Production of gasoline by hydrogenating the McMurray tar sands and coal in the province by using hydrogen from the Turner Valley field now going to waste, was the theory advanced by Prof. Edgar Stanfield, of the research council of Alberta, recently, to the meeting of the Canadian Institute of Mining and Metallurgy, Northern Alberta's branch.

The Robin Hood Mills, Limited, is reported preparing plans for erection of a 450,000-bushel concrete grain storage tank in connection with their Calgary mill, construction to be undertaken shortly at a cost of between \$60,000 and \$75,000. The company is one of the large Canadian flour-milling concerns with mills at Moose Jaw and Saskatoon, as well as at Calgary. The products include oat meal and rolled oats, as well as flour.

From Our Own Correspondents

### COWLEY HAPPENINGS

April 12.—Mr. and Mrs. Owen, of North Fork, are rejoicing over the birth of a baby. Congratulations.

School closes here tomorrow for the Easter holidays.

Mrs. F. A. Tustian entertained the ladies at an afternoon bridge party on Tuesday at her home, in aid of the Anglican church fund. Mrs. Ethel Bouthillier was awarded the prize, after which a dainty luncheon was served by the hostess.

Mrs. Gerald Bradshaw entertained the members of the Busy Bee Club on Tuesday night at her home. Aside from the work done by busy fingers, the jolly chatter which went the rounds made this a very pleasant, yet beneficial evening spent, at the close

of which the hostess served a dainty repast.

Miss Alice Cooper has gone to Calgary to join her parents, and where we understand she will reside in future.

Harry Pratton is a business visitor to Calgary.

Mr. and Mrs. C. Danbols, of Bellevue, are receiving congratulations upon the birth of a new daughter. Mrs. Danbols will be remembered as Miss Isabel Morrison, of Cowley.

[The above items were received too late for our last issue.]

Miss Jean Morrison is spending Easter holidays in Calgary.

Miss Irene and Master Albert Wells, of Bellevue, are paying a visit here to their aunt, Mrs. R. Littleton, during the holiday season.

Miss Jennie Helbén is spending Easter vacation at Coleman with her parents.

Miss Nellie McWilliams is paying her mother a visit at their ranch home, north of Landbreck, during the Easter holidays.

After residing in the vicinity for several months past, Mr. and Mrs. Turner have returned to Calgary.

Miss Elaine Porch is spending the holiday season with her parents at Macleod.

Miss Edith Murphy is paying a visit to Mr. and Mrs. L. V. M. Peel and family at Blairmore.

Miss Clare Bundy is spending Easter holidays with her cousins at Erickson, B.C.

Miss Mildred Easterbrook has returned from Bassano, where she has spent the last few months.

Easter gayeties and festivities were considerably curtailed owing to the heavy snow storm, which fell over the district during holiday time; but, nevertheless, the land was in need of a good soaking, and the added assistance was very welcome.

Mrs. M. A. Murphy entertained the Cowley ladies at an afternoon bridge party, in aid of the Anglican church fund, at her home on Tuesday afternoon, when Mrs. Gerald Bradshaw won the prize.

Mrs. Daniel McIsaac, of Calgary, paid an Easter visit to her parents here, Mr. and Mrs. Fred Tustian.

Miss Essie Bennett spent Easter with her parents at their ranch home, west of town.

Mrs. McCabe and family have returned to Grand Forks, B.C., from paying a visit to H. C. Morrison and family.

Mr. and Mrs. Ralph Easterbrook, of Calgary, paid a visit recently to Mr. and Mrs. Ed Cowin.

### BELLEVUE HAPPENINGS

Mrs. J. Armitage, of Calgary, spent a few days in town, the guest of her sister, Mrs. W. Hampson.

J. Tutt and Joe Swanson left for Vancouver on Wednesday afternoon. The dance staged by the Arcadians in the I.O.O.F. hall was not very well attended.

Mrs. E. W. Christie returned home the latter part of the week from Lethbridge, where she had been visiting for a few days.

Miss Bessie Morris left for Calgary on Friday afternoon, to spend the Easter holidays.

Mr. Kemsley, of the local teaching staff, left for Lethbridge to spend the Easter vacation.

Stan Amos left for Cadomin on Friday afternoon.

Mrs. Watts Goodwin and Mrs. B. Goodwin left for Calgary on Saturday for the holidays.

Luther Goodwin, of the Calgary normal school, is home for the holidays.

Mrs. J. Nansen, John and Henry, of Nanton, are spending the holidays in town.

Miss Bessie Spooner underwent an operation in the local hospital on Tuesday.

Bellevue patrol leaders, Jack Wood, Alex. Costick, Fred Radford, Joe McIntyre and Gerald McIntyre, accompanied by Mrs. J. J. McIntyre, left for Lethbridge on Wednesday, where they will attend the patrol leaders' training course on Thursday, Friday and Saturday.

Miss Kath. Costick is spending the holidays with Mr. and Mrs. Bent at Landbreck.

Hilding Haglund, of Waterton, was visiting in town on Tuesday.

### HILLCREST HAPPENINGS

Mr. and Mrs. H. Webster and family were Mountain View visitors over the holidays.

Alice Greener returned home from Calgary on Thursday night.

Misses Bessie and Mary Davies returned from Calgary on Thursday. The Hillcrest concert party took part in the service at the Coleman United church on Sunday night.

Mr. and Mrs. A. Cassagrande and daughter Celestina returned home from Edmonton last week.

The Hillcrest concert party, under the conductorship of Mr. T. Baynon, journeyed to Michel on Tuesday evening, where they held a very successful concert. They were assisted by Mrs. D. Thomas and James Marshall.

Mr. and Mrs. J. Ironmonger, Junior, accompanied by Miss Elsie Ironmonger, motored to Calgary over the week end.

Mr. J. E. Cruickshank returned from Edmonton on Thursday evening. J. Collins left for his home in Calgary, where he is spending the Easter holidays.

Miss B. C. Sellen spent her vacation in Calgary.

Mr. and Mrs. Percy Salt and Ellen were visitors in Calgary over Easter.

Miss Irene Turner is spending her vacation in Coultas.

Miss Eva Sharotta returned from Calgary on Friday.

A very successful concert was held under the auspices of the Hillcrest String Orchestra and the Blairmore Concert Orchestra in Cole's theatre on Wednesday evening last. Mr. F. J. Smith was chairman. The programme was in part as follows: Selections by the Blairmore concert orchestra; piano solo by Isabel Westrup; string quartette selection by James Marshall, Misses Helen and Catherine Rose and Miss Jean Cruickshank; vocal solos by Mrs. Cranston, Nancy Thomas and Mrs. D. Thomas; dances by Gertrude Scott, of Blairmore; violin solos by George Kerr and Roy Upton, of Blairmore; selection by the Blairmore string quartette, J. E. Upton, Roy Upton, Sandy Ferguson and George Kerr; piano solo by Miss Francis Lillville. The programme was concluded by the overture, "The Mill of the Cliff," by the Hillcrest string orchestra, under the conductorship of Mr. W. H. Moser, and "God Save the King."

### OPERATION FERNIE MINES URGED BY MEMBER

FERNIE, B.C., April 18.—Thomas Uphill, M.L.A., on Monday afternoon spoke at a large meeting of unemployed in the Grand theatre in Fernie. Mr. Uphill told of his efforts in the hope at Victoria to have the Coal Creek mines taken over by the government, and worked co-operatively by the miners. He said among the mines staff at Fernie and Coal Creek were some of the most capable operators in Canada. He said if the company had only the Coal Creek mines, those mines would be in operation. If another company could obtain them they would operate them.

It was a question of the company having two lots of mines and only wanting to operate one, irrespective of the effect of this policy on the miners of Fernie.

As the townsite of Fernie had been owned by the Crows' Nest Pass Coal company—originally, and as they had sold all the lots in the Fernie townsite, deriving considerable sums of money from these sales, he thought that they had no right to now desert the city for another camp where the invested capital was only a fraction of that in Fernie. It was not as if the Coal Creek mines were worked out, there were millions of tons of coal up there yet, which could be mined at a reasonable cost. He felt sure the miners could work it to pay

### SOUTH ALBERTA

#### PIONEER PASSES

Typical of the courageous and adventurous spirit of those history-makers of the early west was Mrs. Macleod, widow of the late Colonel J. F. Macleod, whose death on Saturday at the home of her daughter, Mrs. J. Montgomery-Bell, was widely mourned throughout this province.

The late Mrs. Macleod was born on October 11, 1852, in Fort Garry. Travelling at different times over the "Hudson's Bay route," her father, William Drever, who was born in the Orkney Islands, and her mother, who came from Aberdeen, met for the first time in Fort Garry.

As a girl, Mary Isabella Drever, later to become the bride of Major Macleod, lived with her parents, brothers and sisters in Fort Garry. Her fearlessness, even as a child, was remarkable, according to many stories told by those who knew her in those pioneer days.

Her family offered a warm welcome to the soldiers under General Walseley's command when they arrived at the Fort Garry settlement in 1870, and the spirit of this young

## The Jig-Saw Puzzle Of Life.

Have you participated in the prevailing rage or fad of these latter days of the depression—the jig-saw puzzle?

If so, what did you get out of it? A few idle hours of lazy enjoyment as you sorted out the many and variegated colored pieces, cut in all their fantastic shapes, and sought to fit them together? Is that all you got for your money, your time, your intent concentration? If so, it was largely waste, and you would have been better employed in reading, or some light occupation, or even lying down in quiet and complete relaxation.

Or did you, as your fingers played with the fascinating bits of colored cardboard and you pieced them together until out of a jumble of colors the design of the artist began to emerge into a thing of beauty, allow your thoughts full sway, and even study your own reactions to the comparatively life task in which you were engaged?

For example, as hour after hour slipped by while you selected this piece and that and maneuvered them about the table, endeavoring to make them fit where it seemed they ought to fit, but would not, did you become more and more impatient, or were you actually and truly developing what has become to many people—the lost art of patience? The question is: Did indulgence in this jig-saw pastime strengthen or weaken your will power to cope with the real puzzles which life itself presents?

Did working over the jig-saw suggest anything else to you? Did your employment in this form of recreation for tired bodies and troubled minds, lead to more serious thought, to a contemplation of the complications of life, the consolations of life, and as you finally solved the puzzle, the rewards and the beauty of life? Did you pause in contemplation of your own life, and give some heed to the pattern you were weaving out of the many pieces under your control to make it a thing of beauty, or mar it with ugliness?

A well known author, writing in the current issue of a popular magazine, tells how she spent most of the night working over one of these intricate jig-saw puzzles. As she worked well into the small hours, the pattern of the puzzle continued to elude all her efforts; she could not make the design come together; it persistently lacked both coherence and purpose. She became discouraged as the hours went by, growing both impatient and inaccurate, until, at last, in extreme desperation, she laid one improbable piece against the other one, and brushed aside those sections she had nearly completed.

Having almost given up hope of successfully solving the puzzle, she saw a certain inoffensive fragment of one side of the table. It was a tiny piece, and yet, when she had fitted it into the puzzle, her difficulties suddenly vanished. For that tiny fragment held the necessary clue to the puzzle's color and line. Set in its place, the pattern became clear and the design stood out in bold, brave fashion. In fact, in a very short time the jig-saw puzzle had ceased to be a puzzle; it had become a picture.

Surveying the finished picture, this author said to herself: "Life is pretty much this way. It is a mass of irregular, jagged pieces until we are able to find the secret of it. It seems absolutely without meaning until we've located the key piece."

The key piece—it is all important whether in working out the solution of a jig-saw puzzle or that still more intricate pattern of our lives. As the lady we have quoted further says, many of us work doggedly through the long darkness over the jig-saw puzzle of life. Often our profitless labor carries us well into the dawn, until we meet that hour when vitality is at its lowest ebb. We are prone at this time to grow confused and inaccurate, tearing up the bits that we have put in order, trying to fit impossible sections together in a foolish manner.

This is a dangerous period in our lives,—in the lives not only of individuals, but of communities and states. It is then we are inclined to engage in rash experiments, to forsake all the wisdom and experience of the past. We do not always realize that we are discouraged and confused because the key piece is missing. But it is there, and invariably, even though that piece has long eluded us, we will find it—if we have patience and vision. It is not the part of wisdom to destroy the whole picture, but to continue to hunt for the missing piece,—the key piece,—that will serve to point out where other pieces have been misplaced, where additional pieces should be placed, until the whole stands out strong and splendidly completed.

And here is the greatest and kindest truth in the whole world,—the key piece is usually a little thing that lies close at hand! This is true in a jig-saw puzzle employed to pass an idle hour; it is true of the key-stone of a great and beautiful building; it is true in life itself no matter how complicated and tangled it may seem.

An acquaintance of the writer, a young lady who is slowly recovering from a lingering illness of more than a year's duration, has passed many a weary hour working jig-saw puzzles. When asked if they did not tire her, she replied: "No, but as I work at them, having little else to do but rest, I give thought to what I am going to make of my life."

As you work over your jig-saw puzzles, what are you thinking? What are you making, what do you intend to make, of the all-important jig-saw puzzle of your own life?

More books have been written on Abraham Lincoln than any other man. Napoleon held the record prior to 1870.

The Maria, a fish that is plentiful in Lake Winnipeg, is sometimes called the fresh-water ling.

The entrance to the harbor at Churchill, Manitoba, has a low water width of 1,600 feet with a minimum depth of 30 feet.

Giraffes, when their food is juicy can do without water almost as long as a camel.

## Unlooked For Discovery

Tests At Cornell University Indicate Diet May Cause Heart Trouble

An unlooked for discovery that diet may cause heart disease comes to light with the death of "Depression," the prize synthetic diet goat of Cornell University.

Apparently in perfect vigor, "Depression" had excited a few days ago and dropped dead. Autopsy showed death due to degenerated heart muscle, in the ventricle.

"Depression," moreover, was the sixth goat fed on the synthetic diet, and all the others died of heart disease. This was a 100 per cent record for whatever caused the fatal diet deficiency.

The diet substitutes cellulose for hay. It includes starch, casein, the solid part of milk, various mineral salts, yeast and cod liver oil. It is fed to goats and other animals in the Department of Animal Nutrition under direction of Dr. L. A. Maynard and Dr. C. M. McCay. The object is to discover the food factors best for animals.

Depression was 10 months old, the first herbivorous animal in history to live any length of time on synthetic "hay." His age brought home the significance of the diet heart complex.

Whether there may be human lesions in the heart diet factor is not known. In view of the fact that heart troubles cause more than twice as many deaths annually in the United States as the next most fatal disease, cancer, scientists regard the goat experiment with interest.

## National Dairy Council

Allan C. Fraser, Of Calgary, Is Appointed Secretary-Treasurer

Allan C. Fraser, well-known Calgary agriculturist, has been named secretary-treasurer of the National Dairy Council of Canada, succeeding W. F. Stephen, of Ottawa. Announcement followed the close of the two-day annual meeting of the council at Toronto.

W. H. Foster, of Hamilton, and P. C. Colquhoun, of Maple Creek, Sask., were returned as president and vice-president, respectively.

Feature of the annual meeting was the amendment to the constitution providing equal representation on the executive for producers and manufacturers. The latter had previously enjoyed two-thirds representation on the board. The number of voting delegates on the council was reduced from 33 to 18.

Producers named their executive members as follows: P. C. Colquhoun, of Maple Creek, Sask.; Norman Clarke, of Didsbury, Alberta; R. U. Hurford, of Courtney, B.C.; Hector Cullen, of Truro, N.S.; and W. L. Carr, of Huntingdon, Que.

Manufacturers' representatives on the executive are: Col. C. B. Price, of Montreal; W. H. Foster, of Hamilton; Robert Barbour, of Yorkton, Sask.; J. M. Carruthers, of Winnipeg; and W. G. Marritt, of Toronto.

Appointment of Mr. Fraser to succeed Mr. Stephen will take effect on the latter's 70th birthday, May 28.

## Improving Wheat Section

Scientists Aim To Produce Same Quantity From Half The Acreage

Not the doubling of the wheat crop, but on the other hand producing the same quantity on half the acreage, and in that manner reducing the cost of production, is the aim of Dr. H. T. Gussow, Dominion botanist, who attended the conference of plant breeders, plant pathologists, and cereal chemists from Ottawa, and the western provinces held in Winnipeg.

Dr. Gussow said that while success is not yet in sight, his attainment appears within measurable distance, though several years' further research and experimentation will be needed before this aim can be said definitely to have been reached. Dr. Gussow's interests extend from the Atlantic to the Pacific, and he has assistants all over Canada working on new or improved varieties of different plants. He is now making a tour of the west inspecting the results secured at different points.

## An International Preacher

Use Church In Canada and Also In United States

With a church in British Columbia and another in Alaska, Rev. Frank H. Bushfield, formerly of Winnipeg, can claim to be working out church unity on an international scale.

One congregation worships in the United Church of Canada at Stewart, B.C., and the other, the Methodist Episcopal Church of United States, at Tyder, Alaska. Mr. Bushfield belongs to the Prince Rupert Presbytery of the United Church. He is a graduate of Victoria College, Toronto, and has served in Alberta and Vancouver.

## U.S. Creates New Jobs

According to the Christian Science Monitor, the United States is about to open 250,000 jobs of a brand new kind to the unemployed. Senate and House put the final touches on the first of the unemployment measures and Department of Labor agencies will begin enrolling willing workers for reforestation, soil erosion and conservation work. Life in forest camps will beat pounding the pavements.

Trade between Russia and China is reported to be increasing.

Edinburgh has an anti-food-waste drive.

## Debate Via Radio

Speakers In Edmonton, Saskatoon and Winnipeg In Consecutive Discourse

The recent radio debate between representatives of the University of Alberta and the University of Manitoba was the first in local history and the third in a series. It was unique in that the public, listening in, heard speakers in Edmonton, Winnipeg and Saskatoon, in consecutive discourse, without a hitch or mechanical difficulty.

Telephone wires connected the three stations; and four times during the broadcast the flow of sound between Edmonton and Winnipeg, and vice versa, had to be changed by reversing the repeaters. This operation, requiring thirty seconds each time, was accomplished so smoothly that the public was unaware of it. And as a flourish of mechanical perfection, the Saskatoon station broadcasted music, while the judges were arriving at their decision, which was heard by receivers tuning in on all three studios.

Such types of broadcasting are passing the stage of "stunting," since they reach the public completely and clearly. It is another indication of the possibilities becoming apparent in radio, of a serious and thought-provoking character. Winnipeg Free Press.

## Helps With Inventions

Wife Of Noted Inventor Gives Him Valuable Assistance

Mrs. Alice Mary Herbert Russell Brown, who announces in the "London Gazette" that she intends to assume the Christian names of her husband, Mr. Sydney George Brown, F.R.S., instead of her own, is a most able lady, who has taken a leading part in developing her husband's amazing electrical and gyroscopic inventions. These have won him many distinctions. He is one of the greatest and most prolific inventors of modern times. By means of one of his inventions the Flying Corps first received wireless messages on airships and aeroplanes and his gyroscopic compass is one of the most interesting marine devices of the age.

## Should Know His Route

Motorman Has Covered Some Ten Miles Over 200,000 Times

William Willis, aged 66, of Oakland, Calif., can claim to be one of the world's greatest globe-trotters. Although in the last 44 years he has covered only 10 miles of the earth's surface. His right to a travel record rests on the fact that he has shuffled back and forth over that same ten miles more than 200,000 times. He is a motorman and for 44 years has been on the same route, a distance of five miles from Berkeley to a ferry wharf. His total mileage via trolley car is 2,059,200, a distance equivalent to almost 100 times the circuit of the earth at the equator or ten times the distance to the moon.

## Bear Rugs Are Cheap

Some Selling At The Pas For Only Ten Dollars

Fur rugs for floor covering are coming back in style as the result of low prices for skins. Making of bear rugs and the mounting of heads and paws and claws has developed into quite an industry at The Pas. Little white bear rugs, a novelty of the Churchill country, sell as low as \$10. Little black bear rugs may be had for even less. A nice big polar bear rug is worth \$75. Black timber wolves run up to \$20.

## A Good Egg Story

A versatile hen of New Rochelle, New York, laid two eggs, one of which was battleship grey and the other jet black. Then she laid an ordinary white one, much to the relief of Mrs. Michael Cireselli, her owner. The white one had a double yolk. The colored eggs are not broken, so the state of their interiors is not known.

No one food has more value for the brain than any other, though fish have been called a brain food.

Sour milk will remove rust from white goods.

## Headaches and Dizzy Spells

### Nerves in Bad Condition

My nerves were in such bad condition I found it almost impossible to get a good night's sleep. I was also bothered with headaches and dizzy spells. I tried many different remedies, but they did not seem to give me much relief, but after I had taken Milburn's Heart Nerve Pills I could hardly believe the change they had made in my condition.

## Better Broadcasting Service

Major Murry Compares British and American Systems

Public service broadcasting under remote government control has many advantages over programmes sponsored by advertisers, in the opinion of Major W. E. Gladstone Murry, of the British Broadcasting Commission, who addressed the Canadian Club in Montreal.

Comparing United States and British broadcasting, he found the best programmes in the States were equal to the best British broadcasts, but owing to the difficulties to be encountered with in the United States, their average programme was not as good as the average British programme.

One of the principal difficulties on this continent was that they did not have, as in the case of the British system, a definite and adequate revenue, leaving them free to consider no interests but those of the listener. The British commission was not tied up in any way with commercial interests, whereas in the States they have to consider the advertiser all the time. That was his main reason for thinking the public service system was better.

He considered the essentials of a good broadcasting service. First, that it should be organized for public service and as a public service; secondly, that priority of entertainment in programmes should be recognized.

He looked forward to development of interchanges of programmes between different parts of the Empire, leading later, perhaps, to international exchanges.

Interchanges of folk-song programmes and such broadcasts as would show the characteristics of a people would be of great imperial and international value, he said.

## Government Could Not Escape Certain Payments

Bulk Of Expenditures During Last Year Were Unavoidable

This loss (deficit) wasn't because the government was extravagant, says the Ottawa Journal. It was because the bulk of government's expenditures was unavoidable. The government couldn't escape paying \$125,000,000 interest on the national debt. It couldn't escape paying \$50,000,000 for veterans' pensions. It couldn't escape paying to help keep people from starving or freezing. And it couldn't escape paying over \$50,000,000 for deficits of its railways. No matter how much the government's income fell, no matter how it felt or what it tried to do about economizing, these payments, so far as last year was concerned had to be made. They were fixed, unavoidable. Thus nobody is to blame.

## Another Aid For Aviators

With the aid of radio apparatus it is now possible to take off from an airport, climb up through fog and storms and then, without seeing the ground, to fly hundreds of miles to a certain destination, come down without seeing the ground and make a perfectly safe and normal landing.

Bandit—Now, then, put 'em up quick!

Postmistress (a keen student of American gangster thrillers)—Now that's entirely wrong to start with. You should say "Stick 'em up, baby, and make it snappy!"

## YOUR LIVER'S MAKING YOU FEEL OUT OF SORTS

Wake up your Liver Bile.

—No Calomel needed

When you feel blue, depressed, sour on the world, that's your liver which isn't pointing its daily two pounds of liquid bile into your bowels. Bile is the natural cleanser of the system. It is the only food in assimilating and digesting food. It is the only food in assimilating and digesting food. It is the only food in assimilating and digesting food.

W. N. U. 1990

## ADMITTS GUILT IN SOVIET CHARGE OF SABOTAGE

Moscow, Russia.—W. H. MacDonald, one of the six British engineers who went on trial on charges of sabotage, bribery and espionage, made a double admission he was guilty.

He entered a plea of guilty when the session opened. The first witness recited a detailed story MacDonald had bribed him to act as a spy, and the young Briton confirmed almost all of this testimony.

The other Britons on trial—Allan Monkhouse, Charles Nordwell, L. C. Thornton, W. A. Gregory and John Cusny—all pleaded not guilty. Eleven Russian employees of the Metropolitan Electrical Company, for which all of the Britons worked, pleaded guilty.

In London official circles MacDonald's plea did not come as a surprise, for it was considered the result of his long solitary confinement and the methods of questioning employed by the Soviet police, described by the British as "third degree" methods.

The other Britons pleaded not guilty to an indictment which is based upon the testimony of a woman named Kutzova. She said they all were spies, that they had bribed Russians for information which they sent to England, and that they had systematically damaged important Russian industrial plants.

The 11 Russian employees of the company included one woman. They pleaded guilty.

Their trial started in "October Hall," the house of the trades unions, which was guarded closely by uniformed and bayoneted soldiers stationed inside and outside the court room.

"October Hall" was crowded to its capacity of approximately 500. Spectators were admitted only by card.

Four judges, one of whom is an alternate, were seated on the "red-draped table on an elevated dais, back of which stood a squad of uniformed soldiers.

The prisoners were seated in a dock to the right and behind the judges, with two soldiers, with bayonets fixed, standing immediately in front of them.

Nine defence attorneys were in court, five of them representing the Englishmen.

To the left sat sandy-haired and bespectacled Prosecutor Audrey Vishniak. He had one assistant.

Monkhouse, Nordwell, Thornton, Gregory and Cusny first filed in, followed by the remainder of the prisoners, who had been kept in custody. (All of the British subjects except MacDonald had been released on bail).

## Lower Trade Barriers

Move To Facilitate Trade Between Canada and U.S.

New York.—A despatch to The New York Herald-Tribune from its Washington correspondent, says a survey suggesting a possible basis of agreement to lower trade barriers between the United States and Canada has been completed at the United States capital.

The despatch goes on to say that an exhaustive American examination of the present commerce over the northern (Canadian) border brought Washington officials to the conclusion the United States could lower its tariffs on Canadian cattle, fish and lumber in return for Dominion concessions in customs regulations and methods of valuation, and in the Canadian duties on American coal, steel, machinery, chemicals and an impressive list of manufactured articles.

### Chicago Teachers Parade

Chicago.—Chanting "We want cash!" more than 1,000 demonstrators paraded through the Loop here in protest of non-payment of school teachers, stormed the offices of the board of education, and smashed their way through a door before seeing Orville Taylor, board president. The city owes teachers some \$28,000, 600 in back pay.

### Unable To Speak

Oak Park, Ill.—The parents of Miss Patricia McGuire, ill with sleeping sickness since February, 1932, reported a fifth injection of serum, prepared from the blood of victims who have recovered from the disease, caused a marked improvement in the girl's muscular activity, but that she was still unable to speak.

W. N. U. 1900

## Akron Naval Inquiry

Evidence Indicates That Mammoth Dirigible Broke In Mid-Air Lakehurst, N.J.—A picture of the mammoth dirigible Akron dropping through darkness with its bow up at an angle of 35 degrees and hitting the water with a crash "like stepping on a penny box of matches," was given the United States naval court of inquiry here.

With the picturesque words of a sailor, Moody Erwin, aviation metallurgist, second class, told the story of the flight that cost 73 lives. Erwin was one of three survivors of the disaster.

Erwin joined Richard E. Deal, boatswain, in telling of the breaking of longitudinal girders and the steep incline of the ill-fated airship following what both described as a terrific "gust of wind."

Both, too, testified the first break in the structure of the ship occurred in the air following the gust they described, whereas Lieutenant-Commander H. V. Wiley, the third survivor, changing his opinion, said the ship's framework did not break until the Akron struck the water. The break described by the two enlisted men was in longitudinal girders, on the right hand side, midway between the bottom and top.

## Curb Reckless Skiing

More Stringent Regulations In Mountain Areas Are Recommended Banff, Alberta.—Curb of reckless skiing in mountain areas was sought as a consequence of the inquiry into the death of Dr. R. E. C. Paley, English scientist, who was killed in a fall from Fossil mountain while skiing over prohibited areas.

A coroner's jury concluded its work with the finding Dr. Paley came to his death through manslaughter while trying to traverse a steep snow slope on Fossil mountain. It added to riders the federal parks department draft stringent regulations governing skiing expeditions from all camps.

What action would be taken to safeguard skiers within park limits was unknown here. Regulations barring skiers from certain dangerous areas are now in force and all skiers are warned of the prohibited areas by club officials on arrival at the camps. It was expected the department at Ottawa would obtain recommendations from the minister's "advisory committee" with a view to implementing local regulations.

## H.B. Co. Report

Improvement Is Shown Over Last Year In Annual Statement London, Eng.—Substantial improvement over last year is shown in the annual report of the Hudson's Bay Company, Limited, for the year ended January 31, although a trading loss of £225,324 is reported after the allocation of £199,381 to depreciation.

Appropriate provision has been made for losses in respect of investments and also against the value of the company's properties, £106,297 has been provided against losses on sales and the disposal of properties. It has been decided to release properties which have become superfluous, although such sales may involve a book loss for the current year. Provision has, therefore, been made for the losses incurred and a reserve set up against further anticipated losses in this connection.

## Letter Of Forgiveness

Toronto, Ont.—In behalf of a group of Toronto clergy, a letter of forgiveness has been sent to John A. Macchray at Stony Mountain penitentiary, to which he was sentenced to seven years for theft of funds from the University of Manitoba. Rev. H. P. Woodcock and the Oxford group had brought a "change of heart" to himself and fellow clergy, and it was decided to send a letter of forgiveness to Macchray for the loss of church funds in his custody.

## Reindeer Trek Almost Ended

Ottawa, Ont.—The long trek of Canada's reindeer herd from western Alaska to the Mackenzie River delta is nearly ended. Hon. T. G. Murphy, minister of the interior, said recently the herd, which has been travelling since December, 1929, has arrived at the west bank of the Mackenzie River at the delta where it flows into the Arctic ocean.

## Duties Against Cattle From Ireland

London, Eng.—A new scale of specific duties for live cattle for food imported from the Irish Free State was imposed by a treasury order. In future such cattle, instead of paying 10 per cent. ad valorem per head, will be divided into five classes.

## Mounties For Saskatoon

Unit Of Thirty-Five Sent From Training School At Regina Saskatoon.—Thirty-five mounted R.C.M.P. men arrived by train from the training school at Regina, headquarters for Saskatchewan.

Under the command of Inspector L. J. Sampson, there are two corporals and 32 men in the group. All have horses, brought here in three horse cars over the Canadian Pacific Railway.

According to an official statement the Mounties were brought here to complete their training by mounted patrol work in districts tributary to Saskatoon. All the men have been billeted in a local hotel and their mounts have been stabled in a west side barn. Non-commissioned officers from the new arrivals are Corporals J. Helofs and P. Cleary.

## Currency Depreciation

Secretary For Dominions Refers To Situation In Australia And New Zealand

London, Eng.—J. H. Thomas, Secretary for the Dominions, told the House of Commons he does not think the depreciation of the Australian and New Zealand currencies were deliberate breaches of the agreements signed at Ottawa during the Imperial Economic Conference. Mr. Thomas said he did not think the question appropriate for the British government to make representations on. It was suggested it was done to help trade of those countries.

## INDIA WILL END TRADE TREATY WITH JAPAN

New Delhi, India.—The government of India announced steps had been taken to end the trade convention with Japan signed in 1905. The government has given Japan six months' notice of termination of the "most favored nation" clause of the convention.

Removal of Japan from the list of nations enjoying "most favored nation" treatment in the Indian customs tariff schedules is a protective measure to offset dumping, it was explained by Sir Joseph Blore, commerce member of the viceroy's executive council.

The announcement was made while the legislative assembly was discussing Sir Joseph's motion for consideration of an anti-dumping bill. The minister explained abrogation of the treaty with Japan was intended to offset the effect of special conditions such as Japan's depreciated currency, and other factors which in the dumping of goods in this country at abnormally low rates.

India's greatest customer in recent years for her cotton has been Japan, but this is exported in the natural state and a great part of it is re-imported in cotton piece goods. Japan has gradually increased her advantage over the United Kingdom in selling cotton piece goods to India.

## ATTACKS SOVIET BILL

Sir Stafford Cripps, former Solicitor-General in the MacDonald Socialist Government, who declared himself opposed to the emergency bill passed by the British House, which gave wide powers to deal with the Soviet in the event that the forthcoming trial of six British subjects did not end satisfactorily. He believed it still reading with a large majority.

## No War Pension Reduction

To Effect Desired Economies Without Disrupting Present System

Ottawa, Ont.—No reduction in war pensions, but enactment of legislation which would effect desired economies without disrupting the present pension situation is under consideration by the government. Proposals that the income tax be applied to pensions and that, after a definite "deadline," no more dependents be added to the pensions list have replaced the government's move to suspend payment of pension to war-pensioners in the civil service.

The new plan is understood to have the approval of representatives of the Associated Veterans now in conference here. According to the executive men, the chief merit of the new economy lies in the fact that it will not affect existing pensioners, or at all events only those whose income is sufficiently large to bring them under the operations of the income tax. The small-salaried pensioners would not be disturbed.

## British Exports

Trade Figures Show Evidence Of Business Revival

London, Eng.—An improvement in British exports for March is announced.

Preliminary board of trade figures gave the March export total as £32,581,000, as compared with £27,928,000 for February, and £31,196,000 for March last year.

Imports show £56,346,000, as compared with £49,077,000 in February and £61,181,000 in March, 1932.

## Death Of Scientist

Lausanne.—Jules Picard, father of Dr. Auguste Piccard, explorer of the stratosphere, died here at the age of 93. He was a professor of chemistry in the University of Basel 40 years and was widely known for his scientific work.

## Horse Breeders' Subsidy

Bonus To Assist Farm Horse Industry In Saskatchewan

Ottawa, Ont.—A bonus to owners of stallions in the province of Saskatchewan in which the Dominion and provincial governments will co-operate on a 50-50 basis was announced by Hon. Robert Weir, Minister of Agriculture.

The scarcity of good stallions in the prairie provinces and the shift by farmers from motor traction to the use of horses has made it necessary to assist the horse-breeding industry. Because of conditions in the west with low grain prices many farmers found it difficult to finance the operations of tractors and in the spring of 1932 various horse breeders of the three prairie provinces, approached Mr. Weir urging him to give to stallions which passed federal inspection.

"Each department agrees to pay 50 per cent. of grants to clubs formed this year under the federal club policy. They also agree to pay premiums to owners of all stallions which are not clubbed but that passed inspection by federal inspectors in 1932, and those that pass federal inspection this year," the statement reads.

## The Soo Dominion

New Train To Operate Between Chicago And Vancouver

Chicago, Ill.—Co-ordination of railway services to the west to eliminate duplication will be undertaken with inauguration June 1 of the "Soo Dominion," a train to travel over the Chicago and Northwestern Railway, the Soo Line and the Canadian Pacific.

The train is intended to serve the Canadian Rockies region between Chicago and Vancouver.

R. Thomson, passenger traffic manager of the Northwestern road, said the co-ordination of train service between the Soo line and the Northwestern was "new to this region and is expected to prove beneficial to both roads."

The train will operate over the Chicago and Northwestern to St. Paul, over the Soo line to Portia, N.D., where it will be delivered to the Canadian Pacific, Thomson said.

## HITLER APPOINTS NAZI LEADERS AS GOVERNORS

Berlin, Germany.—Chancellor Adolf Hitler has added the post of governor of Prussia to his duties and immediately appointed Hermann Wilhelm Goerring, one of the principal Nazi leaders and minister without portfolio in the federal cabinet, to serve as premier of the state.

The Hitler appointment as governor was approved by the cabinet, which also named General Franz von Epp, another Nazi, to serve as governor of Bavaria. The general has been acting as federal commissioner for that state.

Captain Goerring, who is in Rome at present, is expected to present in Prussian cabinet list to the chancellor when he returns.

German scientists were angry about a letter written by Professor Albert Einstein from Belgium to the Prussian Academy of Sciences. In this letter, dated April 5, Professor Einstein described present day Germany as being "in a state of mass psychosis."

A report from Cologne said the Rhinish and Westphalian sections of the German People's party, which was founded by Dr. Gustav Stresemann, has decided to disband and urge its members to join the Nazi party. This was believed to spell the doom of the party, whose national executive committee will meet May 7. The government published a law under which the terms of lay judges and jurymen will expire June 30, 1933, instead of ending normally December 31, 1934.

This means the ousting of both panels of Jews and Communists, and presumably also Socialists.

The same law prescribes the expiration on June 30 of the terms of office of all commerce courts judges.

An official denial was given here to reports in the Stockholm newspaper Social-Demokraten, which said that 247 persons, including 17 Nazis, 14 Jews and 218 Communists and Socialists had been slain in Germany from the time of the recharting, February 27, until March 25.

The denial says: "The total political slain in March was not one-tenth thereof."

## LARGEST WHEAT CARRY-OVER IN HISTORY OF WEST

Ottawa, Ont.—Eagerly awaited, the Dominion Bureau of Statistics crop report last week estimated total stocks of wheat in Canada on March 31 as 312,819,144 bushels.

This is 66,668,571 bushels more than at the corresponding time last year.

While this increase is impressive, the report explains last year's crop exceeded that of the previous year by a much greater amount.

Taking into account the amount of wheat which will be needed for use in Canada, seed grain, feed grain, etc., and estimating that 101,000,000 bushels will be exported between April 1 and July 31, the end of the present crop year, the bureau calculates Canada will have a carry-over into the next crop year which begins on Aug. 1 of around 156,000,000 bushels.

Such a carry-over would be the largest in the history of Canada. The record so far was in 1931 when the total was 134,078,963 bushels. Last August the carry-over was 131,844,846 bushels.

The report estimates 19 per cent. of last year's crop of wheat is still in the hands of farmers, which amounts to 80,637,000 bushels. This is the same percentage as last year, although a greater volume, because of the heavier crop last summer.

## C.N.R. Loan

Railway Committee Passes Bill Authorizing Sum For Requirements

Ottawa, Ont.—With a minimum of discussion, the special railway committee of the House passed a bill authorizing the Canadian National to borrow \$15,000,000 for refunding requirements for the calendar year 1933 and authorizing the minister to loan the railways \$47,941,300 to meet the railway's net income deficit for the year.

R. B. Hanson, Conservative member for York-Sunbury, was elected temporary chairman. Hon. J. D. Chaplin, Cons., Lincoln, probably will be the permanent chairman.

The committee decided to override one recommendation of the Duff royal commission on the Canadian National. When the meeting is held, S. J. Hunsger, acting president of the Canadian National and possibly one or more officials of the system, will be present when the annual budget is discussed. The Duff commission suggested no officials appear before the committee.

Chairman Hanson, speaking about railway officials being present, said the recommendation of the Duff commission was a "slap in the face" to the committee. Personally he believed the work of the committee last year had saved many millions of dollars for the taxpayers of the country.

## Calgary Mill Rate

Property Tax For 1933 Set At Fifty Mills

Calgary, Alberta.—City council last night approved a property tax rate of 50 mills and asked the commissioners to redraft 1933 estimates on this basis.

Previously Mayor Davison feared the mill rate would be set at 55, the highest in the city's history, but council last night instructed the commissioners to lower the rate by one mill compared with last year.

## Alberta House Prorogues

Close Of Third Session Of Seventh Legislature

Edmonton, Alberta.—After putting 65 new acts on the statute books of this province, the provincial legislature was prorogued April 11th, by Hon. W. L. Walsh, Lieutenant-Governor.

The speech of his honor brought to a close the third session of the seventh legislature of Alberta which opened on February 9, just over two months ago.

## Demand New Trial

New York.—The International Labor Defence League announced petitions to be presented to President Roosevelt would be nationally circulated demanding a new trial for Heywood Patterson, convicted at Decatur, Ala., in "the Scottboro case." Patterson said he expected 1,000,000 signatures to the petitions within a week.

AKRON SURVIVORS IN WASHINGTON  
Claude Swanson, United States Secretary of the Navy, is pictured as he congratulated Lieutenant-Commander Herbert Wiley and his two fellow-survivors, Richard E. Deal and Moody Erwin (background), on their narrow escape from death in the Akron disaster. The men flew from New York to Washington to give their official version of the catastrophe. They were referred to by Secretary Swanson as "members of a gallant crew who served in the United States Navy."

The doors of the Cowley Co-Op. have been closed.

Mr. and Mrs. Gordon Steeves spent the Easter holiday in Calgary.

Miss McKenzie, of Calgary, is an Easter guest of the Misses Murray at Frank.

V. A. Bowes, assistant district passenger agent of the C.P.R., was in town yesterday.

Over in Russia, Reds demand to be called Reds. Over here it's different. It's considered a libellous offense.

Miss Doris Atwood, of Lethbridge, is spending the Easter vacation with Misses Dorothy and Caroline Moore here.

Dr. and Mrs. R. K. Lillie and baby, and James Smith, proprietor of the Cosmopolitan hotel, were Easter visitors to Calgary.

An Alberta town mayor last week end realized that this earth was moving at the rate of two hundred miles per second.

Salaries of Pincher Creek school teachers have been given a cut, through which a saving to the rate-payers of around \$2,000 is effected.

Miss Mary Sartoris was down from Calgary last week end on a visit to her parents and sisters. She returned to Calgary on Monday, accompanied by her sister Doris.

There will be no relaxation of the legal bans against sweepstake lotteries. By a vote in the federal house on Tuesday night, the new bill was given a six months' hold.

The local schools will reopen on Monday morning next. With about fourteen inches of snow disappearing in about twenty-four hours and leaving no mud, "Gee, this was a joyous Easter!"

Mr. J. R. Gresham, former Blairmore boy, took an active part in the Old Tynes concert at Okotoks recently as a vocalist. He also rendered a solo at the Sunday evening Easter service at St. Peter's church.

The former secretary-treasurer of the Town of Blairmore appeared for hearing on defalcation charges this forenoon and was remanded for eight days at his own request. The case will be prosecuted by J. W. McDonald, K.C., of Macleod.

The local Boy Scouts journeyed to Lethbridge today to attend a series of lectures there, the scouts are under the leadership of George Hills. Those attending are Norman Packer, Donald Gillis, John McDonald and Tommy Crowder. Cars were kindly loaned by Charles Sartoris.

Word has been received from the secretary of the Firgrove Social and Sports Club that we have been elected to honorary membership in the club. This club was recently organized in the district south of Lundbreck, with Miss Ethel I. Cartwright, formerly of Blairmore and teacher of the Firgrove school, as secretary.

Clara Bow, as "Dynamite" Springer ... primitive ... vivid ... irrepresible. The impulsive heroine of Tiffany Thayer's soul searching novel, again blazes forth on the motion picture screen to dim all other stars. Laurel and Hardy, champions of laughter in their latest Hal Roach-M-G-M fun-fest, "Scram." Next Wednesday and Thursday at Cole's.

United States breweries are unable to handle the demand for beer. Now the tables have been turned, so that Canadian capital and qualified brewers are being used in the States. All required now is that Reverend Ben Spence should come up here and become a damned good naturalized Canadian—then go down to that "90th" neighbor of ours and tell her people how drier days have benefited Canada, so that we can be held up as an admirable example.

**Water In Place Of Meals Helps Stomach**

Stomach trouble is often helped by skipping one meal. Drink lots of water. Add a spoonful of Alderika each morning to clean out poisons in stomach and bowels. Blairmore Pharmacy.

**IN MEMORIAM**

In loving memory of Alice M. Brooks, who fell asleep April 19, 1932. "A voice is from our household, gone; A voice we loved is stilled; A place is vacant from our hearth, Which never can be filled." Ever remembered by husband and family.

Murray Saunders is in town from Calgary today.

Louigi Denotaris celebrated his sixty-oneth birthday on Saturday last.

Alex. McFegan, of Drumheller, came down to spend Easter with his family here.

Misses Ona Munson and Mary Webster, of Calgary, are the holiday guests here of Miss Dolly Evans.

Mr. Reid, master mechanic with the McGillivray Creek Coal & Coke Co. at Coleman, was a Blairmore visitor on Sunday last.

The stork visited the home of Mr. and Mrs. John Rudd on Good Friday morning, leaving with them a son—prospective for the Calgary Tigers.

A number of local girls, who have been attending normal school and other institutions in Calgary, returned home to Blairmore for the Easter vacation.

Attempts to introduce daylight-saving time to the British West Indies have failed, for the obvious reason that the days and nights are of pretty much the same length, summer and winter, in the tropics.

**DON'T FORGET THE DATE**, May 30th, at the Columbus hall, commencing at 7.30, a Grand Variety concert, put on entirely by children. Come, see and hear; laugh and grow fat; encourage the children; patronize home talent. Everybody welcome.

The Macleod Gazette of last week states: E. E. "Hap" Reigh, who has been employed at Scougall's garage, has leased the Cayley Motors and is making arrangements to move his family there shortly. His vacancy at Scougall's is being filled by S. Hohn-gard.

DR. A. E. SHORE, of Drs. Gunn, Hackney & Shore, Calgary, will be at the office of Dr. Stewart, Blairmore, on Friday, April 28th, after 2.30 p.m. Any one wishing to consult him with regard to Eye, Ear, Nose or Throat conditions, or to be fitted with glasses, please make appointments with Dr. Stewart.

About forty men are now engaged on relief work near Passburg, under supervision of Mr. McKay; and a similar number are employed west of Coleman. It is interesting to note that not a Blairmore man is among the outfits. Most of them believe that the Wainwright Star's editorial caption, "Canada is an ideal vacation land," is correct.

Grade VIII pupils at the local school had the following standing at Easter, arranged in order of merit: Bobby Harmer, Mable Snod, Maurice Thorpe, Carlotta Fleming, Wilma Wheatcroft, Rita Duncan, Edith Oakes, Shirley Bannan, Richard Bennett and John Yanota, Donald Gillis, Arthur Peters, Florence Picard and Henry Koontges, John Krkosky, Telena Bouthiller, Lawrence Dunkley, William Duncan and George Kerr, Mary Campo and Margaret Uhrin, Lillian Packer, Lillian Perry, Aloyes Lencucha, Vearnella Packer, Joe Lencucha, James Patterson, Elizabeth Irvine, Alex. Blas, Joe Huchais, John Dobek, Lillian Pratt, Mary Morency, Paul Zimka, Joe Chabillon, Dante Vannoni, Nora Bonbardier.
